

VITALII SHUTIAK

Front-end developer

ABOUT ME

I am a frontend developer with 3 years of experience building fast and responsive web applications using React and modern JavaScript. I specialize in clean interfaces enhanced with smooth animations and microinteractions to create better user experiences.

EXPERIENCE

We-nocode

Aug 2024 - Present.

- Developed responsive and interactive web interfaces using React.js, JavaScript, HTML5, CSS3
- Integrated RESTful APIs and worked with Axios and Fetch to exchange data with the backend.
- Used Git and Figma in daily development workflow.
- Collaborated closely with designers and backend developers to create a user-friendly and efficient user experience.
- Worked with design systems and UI libraries (Material UI, Ant Design).
- Developed interactive UI elements using GSAP, Framer Motion, and CSS animations.

Creator IT Academy

Nov 2022 - Aug 2024

- Participated in team-based development under the mentorship of experienced developers.
- Studied and applied React, HTML/CSS, and JavaScript in real-world projects.
- Created responsive and cross-browser layouts using HTML5, CSS3, SCSS, and JavaScript.
- Created landing pages.
